OVERVIEW

We utilize a multifaceted approach to review the accuracy of your EMR and get you the best possible refund:

Classification

We analyze your workers' comp class codes to ensure they are accurate for all employees and that you are receiving all available credits (CPAP, etc.)

Actuaries

We go through all workers' comp claims, reserves, and other actuarial details used to develop your EMR to find common calculation errors

Investigations

We investigate any subrogated claims to ensure any recouped monies by the insurance carrier were properly reported to the Rating Board

Data

We are able to comb through 8 years of records, so even if a mistake was made as far back as 8 years ago we'll be able to get you the refund you deserve!

Fee

We charge on a contingency fee basis, so we only collect a fee if we are successful in obtaining a refund and / or credit for you. Since there is zero out of pocket cost it's a true no risk, WIN-WIN situation for you!

Our process is managed and executed in-house by our licensed workers' compensation refund professionals

Step 1: Authorization

We supply you with authorization forms we need you to sign that allow us to act on your behalf throughout the process

Step 2: Review

Once authorized, we dig into your workers' comp payments history and review items commonly miscalculated by insurance carriers

Step 3: Report

Once our investigation is complete, we supply you with a detailed report on all of our findings explaining where you have been overcharged and how much you stand to recover

Step 4: Collect
